SUMMARY

Android Developer with 1.5+ years of experience shipping production-grade OTT and AI-powered applications. Specialized in Kotlin, Jetpack Compose, ExoPlayer (Media3), and Google IMA SDK, with additional backend exposure in Spring Boot, FastAPI, and LLM integrations. Comfortable owning features end-to-end across mobile and backend layers.

EXPERIENCE

VideoGate Technologies Pvt. Ltd.

Dec 2025 – Present

Software Developer

Hyderabad, India

- Architected and shipped a complete advertisement pipeline across three microservices, including database schema design, REST APIs, and VAST 3.0/4.2 skipoffset generation supporting both single and podded ad breaks.
- Integrated pre-, mid-, and post-roll advertisements for DRM-protected live streams using Google IMA SDK, VMAP, and ExoPlayer (Media3); implemented centralized ad gating, ad-tag generation, and playback controls.
- Built a dual-tier PPV purchasing flow (subscribed/unsubscribed pricing) with Cashfree payment integration for Android live streams; integrated with backend APIs and resolved a client-side pricing issue by refetching stream details after purchase.
- Resolved critical production crashes and stability issues; contributed to features shipped on the Google Play Store application [Home Cinema Plus](#).

Sagenest

Aug 2025 – Oct 2025

Software Developer Intern (Backend / AI)

Remote

- Designed and developed secure REST APIs using Spring Boot with JWT authentication and role-based access control.
- Built AI-powered roadmap generation and content summarization features using LLM APIs.
- Developed a LangGraph-based chatbot with FAISS vector search and session-aware conversations.
- Wrote unit and integration tests using JUnit and validated APIs using Postman.
- Contributed to backend features for [Sagenest](#), an AI-powered platform.

BrainwaveLaw

Jun 2024 – Dec 2024

Software Development Intern (AI / Backend)

Remote

- Developed backend services using FastAPI for AI-powered legal document retrieval.
- Built document retrieval and summarization pipelines using LangChain, FAISS and LLMs.
- Implemented multi-turn conversational legal chatbots with contextual question answering.
- Containerized backend services using Docker.

One Card Solution Pvt. Ltd.

Jan 2024 – Feb 2024

Android Developer Intern

- Designed Android UI screens using XML layouts from Figma designs.

PROJECTS

Journal

- Built an offline journaling and task management application using Jetpack Compose and Room Database following MVVM architecture.
- Tech Stack:** Kotlin, Jetpack Compose, Room, MVVM. [GitHub](#)

E-Shop

- Developed an e-commerce Android application with Firebase Authentication, Razorpay integration and Room-based offline storage.
- Tech Stack:** Kotlin, Firebase, Razorpay, Coroutines, Room. [GitHub](#)

EDUCATION

VIT Bhopal University

2020–2024

B.Tech in Computer Science and Engineering

GPA: 8.0/10

SKILLS

Languages: Java, Python, C++, Kotlin

Backend: Spring Boot, FastAPI, REST APIs, JWT Authentication, Docker, CI/CD

Generative AI: LangChain, LangGraph, FAISS, OpenAI API, Google Generative AI, NLP

Databases: MySQL, Firebase Firestore, Room Database

Tools: Git, GitHub, Postman, VS Code, Android Studio, Figma

Android: Jetpack Compose, Android Jetpack, MVVM, ExoPlayer(Media3), Google IMA SDK, Retrofit, Coroutines

CERTIFICATIONS

- C++ Foundation with Data Structures – Coding Ninjas
- Android App Development Master Course – Coding Blocks
